UNIVERSITY PRINTER

CONTENTS

	PAGES
1. Methods of Estimating the Significance of Differences in or Probabilities of Fluctuations Due to Random Sampling, by George Francis McEwen	1-137
2. Surface Catches of Marine Diatoms and Dinoflagellates made by U.S.S. "Pioneer" in Alaskan Waters in 1924, by Winfred Emory Allen	139-153
3. The Food Habits of the California Sardine in Relation to the Seasonal Distribution of Microplankton, by Ralph C. Lewis	155-180
4. Quantitative Studies on Inshore Diatoms and Dinoflagellates of the California Coast in 1925, by Horace M. Buley	181-187
5. Quantitative Studies on Inshore Marine Diatoms and Dinoflagellates Taken at Five Stations on the East Pacific Coast in 1926, by Dorothea Fox	189-196
6. A Mathematical Theory of the Vertical Distribution of Temperature and Salinity in Water under the Action of Radiation, Conduction, Evaporation, and Mixing Due to the Resulting Convection, by George Francis McEwen	197-306
7. Influence of Varying Oxygen Tension upon the Rate of Oxygen Consumption of Fishes, by Ancel B. Keys	307-317
8. Methods in Quantitative Research on Marine Microplankton, by Winfred Emory Allen	319-329
9. Ecologic Relations of Some Foraminifera, by Richard D. Norton....	331-388
10. Quantitative Studies of Surface Catches of Marine Diatoms and Dinoflagellates Taken in Alaskan Waters by the International Fisheries Commission in the Fall and Winter of 1927-1928 and 1929, by Winfred Emory Allen	389-399
11. Results of Evaporation Studies conducted at the Scripps Institution of Oceanography and the California Institute of Technology, by George Francis McEwen	401-415
12. A Study of the Selective Action of Decreased Salinity and of Asphyxiation on the Pacific Killifish, Fundulus Parvipinnis, by Ancel B. Keys	417-490
Index	491-506
